MICHIGAN

INDEPENDENCE | COMMUNITY | INCLUSION

Incompass Michigan is dedicated to shaping public policy in a manner that optimizes independence and inclusion for individuals with disabilities and other barriers.

1: Continued support for Michigan's investment in Employment First, which results in jobs for people with disabilities.

The FY 18, 19 and 20 Budgets developed by the Michigan Legislature included an investment of \$500,000 to the Employment First Program, leading to thousands of jobs for people with barriers to employment. Please support restoring needed funding of this investment, which helps people with disabilities get jobs with community businesses; connects those who provide job preparation, job placement, and job retention services with the tools they need to succeed; and assists employers with meeting workforce demand.

2: Direct Care Worker Wage Increase: Michigan can't afford not to promote innovative solutions to attract and retain a quality direct care workforce and professionalize the field.

Without the necessary investment in highly qualified workers, and career pathways for direct support professionals, the quality of care and safety of persons served may be compromised - and providers will not be able to meet the demand for necessary services. Please support continued funding for higher direct care wages to promote recruitment, and incentivize continuing education to increase retention.

3: Equitable, consistent, access to person-centered services promoting the social determinants of health.

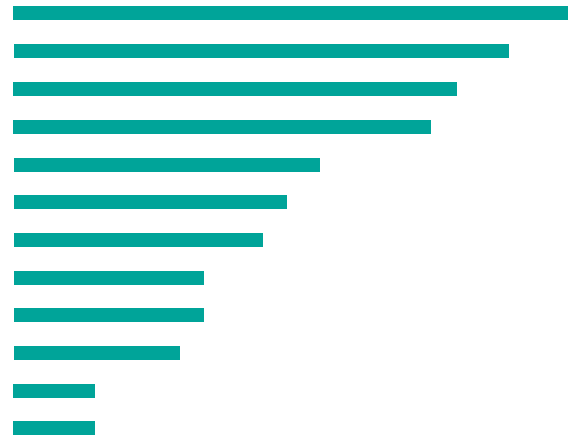

Conditions in the places where people live, learn, work, and play affect a wide range of health risks and outcomes. A baseline array of services should be a part of Michigan's future behavioral health system, for which all persons served are eligible, and which include employment and wrap around community living supports. Equitable access creates social and physical environments that promote good health for all, based on an individual's needs; consistent guidelines improve overall population health and advance health equity.

Incompass Michigan members drive economic development in communities all across the state by working with local businesses to build the talent pipeline.
